Skill Sets:

- Web - HTML5, CSS3, Sass, Less, Bootstrap, React.JS, Next.JS, Tailwind, ServiceWorkers.
- Mobile - React Native
- Programming languages - Javascript, Typescript, Go & C# (.Net core Web API).
- Testing frameworks - Jest, Enzyme, React Test-utils, Cypress (for UI - Automation testing)
- DevOps tools – Jenkins, GoCD, PKS, Helm, Docker & Kubernetes
- AWS Exposure – S3, Textract, EC2
- Logging & Tracing - Grafana, Prometheus, Jaeger
- Automation - shell scripting, cron
- Other – Git, RESTful web services, Swagger, Linux & Windows OS, Tableau

Professional Experience:

OpenText – *Senior Software Engineer*

June 2024 - Present

- Refactored and implemented the admin portal for a cyber security product leveraging **single-spa micro frontend, Redux tool-kit, React-hook-forms**.
- Led the implementation of server-side rendering to optimize performance and enhance user experience for dynamic promotional landing pages, leveraging **Next.js, Optimizely CMS, and .NET Core**

Thoughtworks – *Senior Software Consultant*

Dec 2019 - May 2024

- As a **client-facing software engineer**, I've worked with diverse teams and businesses, helping them leverage agile methodologies and Xtreme programming to successfully solve their business challenges.
- Designed and **built RESTful, TDD unit-tested** web services for authorization middlewares, tracking account expenditure data using **Go's gin-gonic framework** for backend, handling a load of 25,000 Daily average users.
- Developed core modules by writing scalable and clean code to facilitate authorization and visual data reporting in Web With **React.JS** and for hybrid mobile apps (IOS & Android) using **React Native**.
- Built and deployed end-to-end automated pipelines to build, containerize and deploy Web, Mobile, and Backend applications to Kubernetes using **GoCD, Docker & Helm**. By participating in this initiative, I developed a deeper appreciation for architecture and challenges associated with distributed systems.
- Leveraged javascript to provide key contributions to UI - Automation testing using Cypress and Contract tests using **Pact.JS**.

- Responsible for profiling multiple mobile screens in the app for sub-optimal render performance and optimizing it to **reduce the load time of screens by more than 50%** on more than one occasion.
- Incorporated agile methodologies such as **Xtreme programming** in the SDLC to achieve consistent development targets and maintain tech debts.
- Create and maintain microservices leveraging .Net 8.0 and Amazon RDS.
- Setup the automation of Text extraction from digital brochures utilizing Amazon S3, Textract.
- **Facilitated peer-peer learning and knowledge sharing sessions** based on key takeaways from my developmental experience and **lead, organized and conducted the Chennai chapter of GeekNight.**
- Conducted hiring drives and all day handson workshops related React and Web Dev.

Virdhi Tech – Software Engineer (Chennai, India)

Apr 2018 - Dec 2019

- One of a four-member team to have built the user interface of a b2b web application to monitor semi-truck driver's adherence to FMCSA regulations in the USA.
- Responsible for implementing and maintaining mock servers and mock data for the application using koa.js and faker.js.
- Active initiative to improve user experience using React, Typescript, and Material-UI.
- Communicate and collaborate with multi-disciplinary teams of developers, engineers, designers, clients, and stakeholders weekly.
- Leveraged Tableau and Mysql to process, manipulate and transform clean data from a custom data-warehouse into dynamic visual charts.

Convergys – Technical Support Associate (Bangalore, India)

Mar 2017 - Feb 2018

- Provided technical assistance to end customers with queries pertaining to windows OS and other Microsoft services.
- Proficiently handled escalated technical cases of Microsoft office products and online services, also performed investigative root cause analysis of issues related to Windows DLLs.

Education:

-
- **B.E – Computer Science & Engineering**, SVCE, Chennai, India. April 2016
 - Facilitated the computer networks division of the II (Initiate and Innovate) club to connect with fellow students to explore the field of computer networks and game development.
 - Volunteered to conduct events in the symposium as a part of the college tech fest.
